

It's All About Democracy

It's all about democracy
My family came from overseas
They left their land to be free
It's all about democracy

From a land of tyranny and heartache
Something that would make your heart break
It's all about democracy

A land where you have a voice
A land where you can make a choice
It's all about democracy

Today I stand on this ground
In a land where freedom is found
It's all about democracy

Free to choose, free to be
Free to share my identity
It's all about democracy

When I can vote I will use my right
To rally for good and to be a light
It's all about democracy

My family came from overseas
They left their land for you and me
It's all about democracy
